## PODCASTING

If you are new to podcasting and want to find out more, read on .....

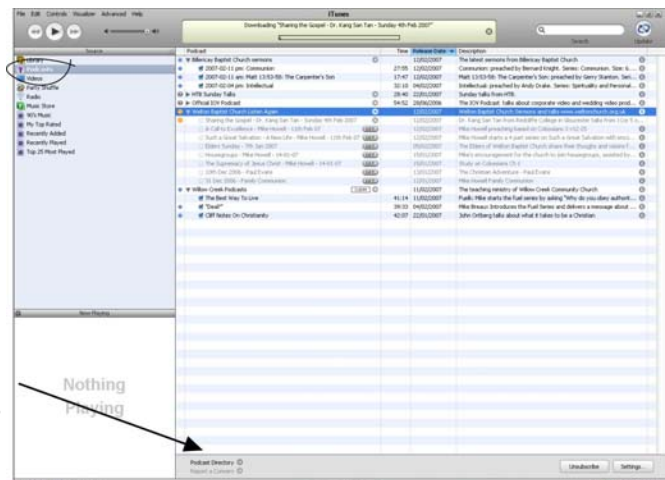

A Podcast is a relatively new method of a website being able to push out audio content or programmes as so-called mp3 files to users who have “subscribed” to the podcast. The audio can be listened to on your PC or can be downloaded to a portable mp3 such as an iPod but although the name suggests it, you don’t need an iPod in order to take advantage of a podcast. If you want to take the podcast out and about with you to listen to when you are on the move, an iPod is one good way of doing it.

Most of our Sunday morning teaching sessions will now be Podcasted and some of the evening ones as well. Here is how to set up your subscription to the Welton podcast.

I have based this explanation on using the software called iTunes from Apple. This is not the only way but I think the easiest. If you don’t have iTunes on your PC you must first download and install it from the Apple web site. Go to <http://www.apple.com/itunes/download/> and just follow your mouse and the on-screen instructions. This is not an exhaustive explanation and there are ways that you can set up iTunes podcast to automatically download any new sermons etc and only to keep a certain number on your PC or device. These things are not covered here so if you want to do these things, please try to find someone in the church who has done it and can help you set it up a bit better. These instructions are just to get you started but once **iTunes** is installed on your PC you are half way there.

Start up **iTunes** and click on **Podcast** on the left of your screen. If you have not podcast subscriptions your screen on the right side will be blank.

Click on **Podcast Directory** at the bottom of the screen

You will then see something like this screen.

Put **WELTON** in the search box at the top right of the screen and hit Enter on your keyboard.

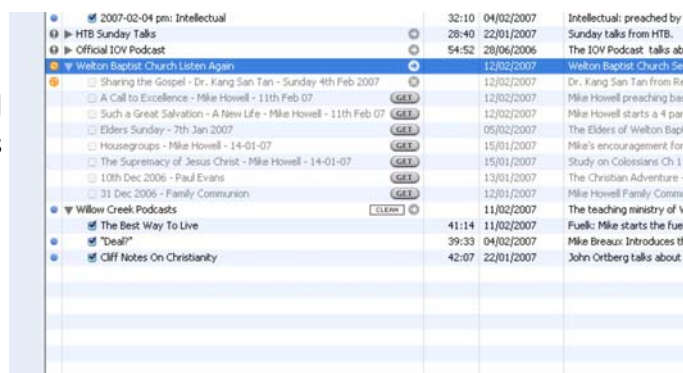

You will then see this screen or something similar with the **Welton Podcast** being displayed in the *iTunes* directory. If there are two entries shown pick the one entitled **Welton Baptist Church—Listen Again**

Click on the **Subscribe** button

Once you have done this *iTunes* will automatically start to download recent sermons from the site.

**Happy listening**
